TILT & TURN

With their innovative hinge system, Tilt and Turn windows offer added safety and convenience features to the traditional casement window. Incredibly easy to operate, in the 'Tilt Position', the top tilts in towards the room to provide enhanced ventilation. In the 'Turn Position', the window opens inwards a full 90 degrees, making it suitable as a fire escape exit and also allowing the exterior of the window to be safely and easily cleaned from inside the house.

FRENCH WINDOWS

Stylish, secure and versatile, French windows, designed in the style as French doors, add a sense of elegance to any home. With two outward openings, and the facility to open either one side or both sides simultaneously, French windows maximise ventilation and also serve as a fire escape exit.

CASEMENT WINDOW

The traditional Casement style window is the most popular and versatile window design and offers superb protection against the wind and rain. Hinged either on the side or at the top, casement windows are the most energy-efficient option for most homes, and with a vast range of styles and decorative finishes available, Budget casement windows are designed to complement any house type.

SHAPED WINDOWS

Shaped frames can create real stand-out and a unique look and feel to any new build home or renovation project. Through our advanced moulding and forming technology, we can create frames in virtually any shape, from round portholes to gothic arches and unsymmetrical shapes.

All shaped frames are designed to complement our Budget window and door range; with a fully sculptured frame finish and a range of colour and glazing options available.

Over 20% of heat loss within the home occurs through old or outdated windows and doors, resulting in expensive home heating bills. Budget products are thermally efficient by design; by selecting Budget windows you could reduce your home heating bills by up to 40%

INNOVATION

With quality and innovation at the core of our business, we are pleased to offer customers a product range that perfectly complements today's current climate.

PRODUCT PERFORMANCE

Our products are manufactured to only the highest quality standards and are backed by an exclusive 15 year performance guarantee.

MULTI CHAMBERS

Multi chambers within the profile help eliminate heat loss through the frame; keeping your home warm and reducing waste energy.

ENERGY PERFORMANCE

Our double glazed windows feature heat reflecting glass and 'A' ratings as standard on all casement-style windows.

CONCEALED GASKETS

Window frames feature concealed glazing gaskets for zero sightlines; ensuring that the gasket rubber does not obstruct the glazing area.

POSITIVE DRAINAGE

Inbuilt channels within the profile system provides enhanced weather performance; ensuring your frames remain fully sealed and watertight.

FRAME FINISH

All frames feature 100% lead-free, virgin skin surfaces. Frames are also fully welded for enhanced mechanical performance and aesthetic appeal.

U-VALUES

U-values take into account all components of the window including the frame, glass and spacer bar; therefore the lower the U-value, the more energy efficient the window.

Our double glazed windows offer U-values of 1.4 W/m²K as standard ('A' rating), with the option to reduce the overall U-value to 1.2 W/m²K. By selecting the triple glazed windows, featuring Soft Coat Xtra and Argon gas, you can further reduce the whole window U-value to only 0.8 W/m²K.

Budget windows are independently tested and certified, and exceed building regulation requirements for energy efficiency, which can be beneficial if renting or selling a property.
